

Making life safer

April 23, 2014

K2 Pure Solutions is pleased to announce that effective June 1st, Rosemary (Rose) Aldrich has accepted the position of Vice President and General manager, K2 Pittsburg.

Rose has extensive Chlor-Alkali manufacturing and technology leadership experience and a strong track record of improved plant safety, environmental and reliability performance in all roles held. She joined Dow Chemical in July 1981 as a production engineer for Chlorine in Freeport, Texas and held numerous manufacturing roles in Chlor-Alkali and chlorine derivatives, including plant operations, projects, process control and turnaround manager. She was named to her first production leader position in 1997, and subsequently held several production leader roles in Chlorine, Caustic, EDC and Vinyl manufacturing plants. She also served as Texas Operations site ISB and work process leader with responsibility for manufacturing empowerment efforts and work process implementation across Dow's largest manufacturing site.

In 2004, Rose was named Technology Director for the Chlor-Vinyl envelope, with global responsibility for process safety and technology improvements for the Chlor-Alkali, EDC/VCM and Chlorinated Organics businesses. Three years later, she became Sr. Director of Manufacturing and Technology for the global Chlorinated Organics business. Rose accepted the position of global Business Manufacturing Director for Chlor-Alkali and EDC/Vinyl assets in April 2012.

Rose earned a Bachelor of Science degree in Chemical Engineering from the University of Houston. She served on the Board of Directors and Executive Committee for the Chlorine Institute in 2012 and 2013. Rose has also served on the Board of Directors for Brazoria County United Way and has held leadership positions in several organizations in the Brazosport Texas area.

In addition to Rose's strengths in operational excellence and technology, she brings a global, strategic mind-set which will play an important role in K2 Pure Solution's ambitions to grow in other regions of the United States.
